

Visit From Minister of Energy and Infrastructure Highlights BOMA Toronto CDM Workshop

On March 5, the Building Owners and Managers Association (BOMA) of Toronto held a workshop in Scarborough outlining the details of its Conservation and Demand Management (CDM) Program.

Brad Duguid, Minister of Energy and Infrastructure and Scarborough Centre MPP, spoke to local owners and managers about the Ontario government's commitment to promoting energy efficiency and conservation in commercial and industrial properties.

"The cheapest energy reduction program is conservation," said Duguid.

"The Green Energy Act is the single biggest CO2 reduction program in North America," he continued. "Ontario is a better placed jurisdiction when it comes to carbon pricing, which is coming."

Following the Minister's address, a series of presentations on energy conservation initiatives and incentive programs designed to offset the costs of energy efficient retrofits were conducted.

Presenters included Wayne Proulx, CDM Program Manager, Chris Tyrell,

Chief Conservation Officer with Toronto Hydro, Jane Dalziel with the City of Toronto's Better Buildings Partnership, Scott Rouse, Managing Partner with Energy@Work and Enwise Solutions, which presented a case study of its client and Scarborough business Atlantic Packaging.

The BOMA CDM Program has been contracted to deliver electricity conservation to the Ontario commercial real estate market as part of the Ontario Power Authority's larger plan to deliver 6,300 megawatts of electricity reduction in Ontario from various sources. The available incentives, capped at 40 percent of the eligible projects costs, are for on-peak demand, annual consumption or cooling ton reduction. The program is designed to maximize participation by the avoidance of both process and contractual complications and the quick delivery of incentive payments.

Ontario Minister of Energy and Infrastructure Brad Duguid addressed attendees of the recently held BOMA Toronto Conservation and Demand Management workshop in Scarborough.

REDUCED ENERGY = INCREASED PROFITS!

The BOMA Toronto Conservation and Demand Management (CDM) Program is offering easily accessible cash incentives to commercial, warehouse, retail, hospitality owners and tenants to reduce electricity in the City of Toronto. Qualified electricity conservation retrofits include: lighting, sub-metering, motors, air conditioning, windows, insulation, control systems and many others for buildings over twenty five thousand square feet.

Up to \$5,500 is initially available to assess the energy conservation opportunities within your properties. We'll assist you in the submission of your incentive funding application. **DON'T DELAY, INCENTIVES HAVE INCREASED FOR 2010!**
